SUMMARY

Computer Science undergraduate (CGPA 3.6/4.0, Merit Scholarship) at SZABIST with production-grade experience in full-stack development, REST API design, and information security. Proficient in ASP.NET Core, Node.js, Flask, and Python with hands-on exposure to Docker, MongoDB, PostgreSQL, and ML model deployment. Google Certified in Cybersecurity.

EDUCATION

B.S. Computer Science | SZABIST University Expected June 2027

CGPA: 3.6 / 4.0 | Merit Scholarship Recipient (2x) | Relevant Coursework: AI, Networks, Database Systems, Software Engineering, Security

INTERNSHIP EXPERIENCE

University Advancement & Partnerships Intern | SZABIST University Dec 2025 – Feb 2026

- Validated data integrity across 200+ institutional MoU records, enforcing security compliance and reducing unauthorized data exposure risks.
- Identified and documented 15+ compliance gaps through structured data analysis, contributing to risk-focused reports for department leadership.

PROJECTS

Protocol-Zero — Game Discovery Platform | github.com/Mustafa-Hazard/Protocol-Zero Apr – May 2026

Stack: React 18, TypeScript, Redux Toolkit, ASP.NET Core 9, MongoDB

- Architected a decoupled full-stack platform with ASP.NET Core 9 REST API (Controller–Service–Repository pattern) and React 18 + Redux Toolkit, delivering real-time search with multi-criteria filtering.
- Optimized MongoDB query performance via pagination and indexing; standardized API responses using `ApiResponseDto<T>` with global middleware.

Steam Game Review Sentiment Analyzer | github.com/Mustafa-Hazard/steam-sentiment-analyzer May 2026

Stack: Flask, MongoDB, Naive Bayes, TF-IDF, scikit-learn, Docker, Python

- Built a full-stack NLP web app classifying Steam reviews using Multinomial Naive Bayes trained on 400,000 balanced samples from a 6.4M-row dataset, achieving 77.86% accuracy with strong recall across both classes.
- Implemented full CRUD operations with MongoDB, a RESTful JSON API, and containerized the stack with Docker Compose for one-command deployment.

AeroNexa | github.com/Mustafa-Hazard/AirlineTicketingSystem Oct 2025 – Jan 2026

Stack: ASP.NET Core 8 MVC, Entity Framework Core, MS SQL Server, C#

- Built a role-based reservation platform (Admin/Passenger portals) with secure session authentication, booking lifecycle management, and automated PDF e-ticket generation.
- Engineered revenue analytics via optimized stored procedures; validated workflows using equivalence partitioning and boundary value analysis.

Attendance Management System | github.com/Mustafa-Hazard/Attendance Oct – Dec 2025

Stack: Node.js, Express.js, PostgreSQL, EJS

- Developed a multi-role platform (Admin, Faculty, Student) with real-time attendance marking, bcrypt password hashing, and server-side session management.

Student CGPA & Probation Tracker | github.com/Mustafa-Hazard/Student-CGPA-Probation-Tracker Apr – Jun 2025

Stack: Node.js, PostgreSQL, Alpine.js, Firebase Hosting

- Designed RESTful APIs with complex SQL to compute live CGPA and auto-flag probation students; optimized queries by 30% and deployed on Firebase Hosting.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL, Java

Frameworks: ASP.NET Core MVC, Entity Framework Core, Flask, Node.js, Express.js, React

Databases: MS SQL Server, PostgreSQL, MongoDB, Firebase

DevOps: Docker, Docker Compose, Git, GitHub, Firebase Hosting, Vercel

Testing: Cypress, Playwright, Black-Box & White-Box Testing, CI/CD Quality Gates, Bug Reporting

Security: NIST Frameworks, Wireshark, Splunk, Linux Hardening, Log Analysis

CERTIFICATIONS

Google Cybersecurity Professional Certificate

Oct 2025

Google AI Essentials

Oct 2025

LEADERSHIP & EXTRACURRICULAR

Core Team Member — ACM SZABIST

Sep 2025 – Present

- Coordinated technical workshops, hackathons, and industry speaker sessions for SZABIST's largest student tech community.

Technical Mentor — Zab-e-Fest

Mar – Jun 2024

- Guided students through live project builds during SZABIST's annual flagship festival.

Finalist — SZABIST Hackathon

Dec 2023

- Placed among top teams in a 48-hour hackathon, building a Car Management System under time pressure.

LANGUAGES

German — Intermediate (B1, Goethe-Institut)

English — Professional (IELTS Band 7)

Urdu — Native
